How to Install and Run the Project Locally
Requirements:
- Windows 10/11 or macOS/Linux with .NET support
- Visual Studio or JetBrains Rider
- Internet access (for dependencies)

Step 1:
Install .NET 9 SDK (or your target version)
.NET 9.0 install it from Microsoft: .NET 9 SDK Download (Preview)
Choose the SDK, not just Runtime
Install and restart your IDE

Verify installation: dotnet --version

Step 2:
Install an IDE (JetBrains Rider or Visual Studio)

Step 3:
Install SQL Server (LocalDB or Express)

Step 4:
Configure Connection String in appsettings.json

Step 5:
Run the Project via IIS Express

Here are the IIS Express configuration with .NET 9:
